Original Twi:st Banner

Finally, a banner stand that offers more. Both form and function have been specifically considered to bring you flexibility, ease of use, stability and an aesthetically pleasing system that will enhance any display.

A commitment to the development of the Twi:st range promises a constant flow of upgrades and additions; guaranteeing that this product will continue to bring you innovation through design.

Assembly

Quick and easy to erect, the Original Twi:st banner takes approximately 90 seconds to set up with graphic and lights.

Photograph (untouched) shows two 900mm wide Original Twi:st banners linked with Easi-link Kit

Features & Benefits

Simple assembly provided through the 'twist' characteristic.

Patented tensioning system allowing for self levelling and taut graphic.

Linkable with Easi-link. Flexi link option.

High stability enabling a number of accessories.

Easily transportable due to it's overall weight totalling approximately 6kg

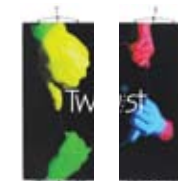

Integrated light

Standard graphic measurement is 700/800/900/1000mm wide x 2000mm height.

Standard height extension of 300mm.

Linkable

Create a true seamless image by placing two or more banners side by side. The patented tensioning system allows the graphics to self level on uneven floors.

Double Sided

The Original Twi:st banner stand comes pre double sided as standard (making a 3D effect also achievable). with the option to downlight both sides through the integrated light cap.

Flexi link

The Flexi link has been designed to allow the user to create and recreate virtually any shape required.

Using the Easi-link kit to join two or more Original Twist banners, the Flexi link sits between two straight graphic panels, allowing you to form a controlled curve to an angle you require, with the ultimate ease.

The self levelling system incorporated through the patented tensioning system allows the Original Twist banners, joined by the Flexi link, to be used on uneven floors; negating the need for unsightly chocks and tape often found when using other systems.

The patented tensioning system provides self levelling on uneven floors.

Graphic Display/Stand Design :

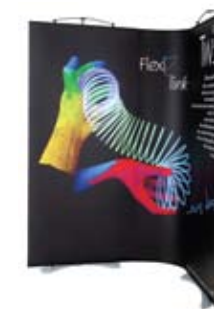

An unlimited amount of Original Twist banners can be linked with the Flexi link, allowing you to create backdrops and displays to suit any specified area. Some basic examples of what can be achieved are shown here.

Example 3 Panel System :

Shown are a few examples of what can be achieved by placing a single Flexi link between two 900mm Original Twist banner stands. The curves are formed by simply moving the stands to create whatever shape you like. A very simple yet effective way to make your banner become much more than a banner stand.

Features & Benefits

Patented tensioning system allowing self levelling and reduced graphic curl.

Unlimited linking using the Easi-link kit, maintaining a positive link that will not break when moved.

Create virtually any shape.

Seamless graphic appearance.

Controlled curve maintaining a smooth appearance through the sprung hanging kit of the Flexi link.

Cost effective solution to graphical backdrops.

Standard graphic dimension is 550mm wide x 2000mm high all of which is visible.

Wheeled Bag

Holds two Original Twist stands, two graphic panels and Flexi link. (Height with extended handle is just over 1000mm).

Media Twist Banner

The **Media Twist** provides the ability to include a monitor within your banner stand display.

With multimedia more accessible to both business and personal users, the **Media Twist** has been made to allow the use of moving image and sound within a traditional banner stand.

The **Media Twist** can be used either on its own, or in conjunction with the **Original Twist** and **Flexi link**, forming an integral and attention grabbing element to any display; proving once again that the **Twist** is much more than a banner stand.

Features & Benefits

- VESA Standard fitting** allowing most flat screen monitors to be used.
- Strengthened uprights** give a maximum weight bearing capacity of 8kg.
- Can be used in conjunction with Flexi link.**
- Standard** graphic dimensions are: 700, 800, 900, 1000mm wide x 2000, 2300, 2700mm high.
- Double sided** for use with Original Twist Graphic on rear.

VESA Standard fitting for bracket in use with Twist Media
